Varicella					✓		✓			
Tdap									✓	
HPV									✓***	
MCV									✓	✓

Please note that a number of these vaccines are available in combinations to decrease the amount of individual injections the child needs.

Pedarix=Hepatitis B, Polio, Dtap

MMRV=MMR and Varicella

Kinrix = Dtap and Polio

\* We also recommend that all children 6 months of age and older get an influenza vaccine every year

\*\* Depending on the brand, the 6 month dose of Hib may not be needed.

\*\*\*HPV is a 3 dose series that can be started as early as 9 but is recommended to be routinely started at age 12

**Protect your child right from the start**
